

Homework 1

MSDS 694, Diane Woodbridge

Description

1. Update “hw1.py” to satisfy the PEP8 standards (3pt).
 - The code should follow the standards covered in class including code layout, whitespaces, comments and naming conventions.

Submit the hw1.py file - the name of your file should be 1) hw1_Lastname_Firstname.py. Make sure it runs in **Python 3.6**.

If you run `pycodestyle hw1_Lastname_Firstname.py > output.txt`, the output (output.txt) should be an empty text file and also the naming conventions should follow the PEP8 standards.
